PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of experience building and optimizing user-focused software solutions for customers with various business objectives. Technically proficient in JavaScript and a critical thinker with a calm and focused demeanor. Beyond a healthy obsession with software development, I consider myself an effective communicator, attentive to details, a logical thinker, a team player, and a transformational leader.

WORK EXPERIENCE

Datamellon, London, UK   NOV 2022 - PRESENT
Software Engineer

- Designed and implemented user interfaces using React.js and Next.js, enhancing user experience and engagement.
- Improved application performance by optimizing frontend code, leading to a 20% reduction in load times.
- Utilized AWS services such as S3, EC2, and Lambda to develop scalable and reliable web applications.
- Set up and maintain CI/CD pipelines using Jenkins and AWS CodePipeline, automating the deployment process.
- Conducted code reviews and ensured adherence to best practices, improving code quality and maintainability.
- Integrated third-party APIs to enhance application functionality and streamline data exchange.

Shestel, NewYork, USA   JAN 2021 - SEPT 2023
Software Engineer

- Developed backend APIs for a high-traffic e-commerce platform, ensuring scalability to handle many transactions.
- Worked closely with product managers, designers, and other stakeholders to prioritize backlog items and deliver features on schedule.
- Played an active role in sprint planning, code reviews, and daily stand-ups, fostering a collaborative development culture.
- Established and maintained continuous integration/continuous deployment (CI/CD) pipelines using Jenkins and Docker.
- Automated unit and integration testing processes, ensuring that 95% of the codebase was covered by tests, contributing to a 40% reduction in post-release defects.

LANGUAGES

- English: Fluent
- German: Intermediate
- Yoruba: Mother Tongue

Dash Language School, Lagos, Nigeria   JAN 2020 - MAY 2022
Front-End Engineer (Team Lead)

- Worked in an Agile-driven environment to effectively maintain project timelines and utilize available resources.
- Developed and implemented responsive website design, resulting in a 40% increase in mobile traffic and a 25% increase in user engagement.
- Managed full-cycle design tasks, handling phases from conception to completion while maintaining guidelines.
- Created and maintained reusable React.js components, resulting in a 60% reduction in development time and a 30% increase in overall code quality.
- Worked with product teams to develop and implement new features, resulting in increased customer satisfaction and online sales revenue.

Side Hustle, Lagos, Nigeria   MAR 2019 - DEC 2019
Front-End Engineer

- Revised, modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Developed and implemented a localization framework, resulting in a 50% reduction in development time and a 40% increase in user engagement in international markets.
- Collaborated with cross-functional teams to develop and implement responsive website design, resulting in improved mobile traffic and user engagement.
- Optimized website performance and reduced page load time, improving user engagement and reducing customer churn.
- Developed and implemented accessibility standards to ensure compliance with regulatory requirements.
